DETAILED ACTION

The amendment filed 12/27/02, entered as a part of the RCE submission filed 2/21/03, increased the number of specific adenovirus vectors (based upon deletions of E1, E2, E3, and/or E4) claimed as a part of the invention, necessitating the following election of species, which is in addition to the election of species of record which carries over.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: adenovirus vectors having different combinations of deletions of E1, E2, E3, and E4. One specific combination of deletions (without use of alternative language) must be elected as the species to be examined. For example, if a species based upon claim 1 is desired to be examined, then the species elected must be selected from one of the following:

1. lacking part of E1 and part of E4.
2. lacking part of E1 and all of E4.
3. lacking all of E1 and all of E4.

Art Unit: 1636

Other combinations are possible based upon other claims. One specific combination of deletions is to be elected as the species to be examined.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, among the pending elected claims, claims 1, 4-6, 8-9, 11-15, 18-21, and 24-27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1636

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
